Accessibility Statement

Bruce Martinson DDS Family & Cosmetic Dentistry is committed to providing website visitors, including persons with disabilities, with access to our website and web-based information and services.

We strive to provide a website that is accessible to the broadest audience possible and have made reasonable, good-faith efforts to follow generally recognized accessibility standards, including applicable guidance provided by the Web Content Accessibility Guidelines (WCAG).

Our Ongoing Commitment to Accessibility

Website accessibility is an ongoing process. Technologies, accessibility standards, third-party integrations, browser capabilities, assistive technologies, and website content may change over time. As a result, some content or functionality may not always operate as intended with every browser, device, or assistive technology.

The presence of an accessibility issue does not reflect an intention to prevent or discourage access. We are committed to identifying and addressing accessibility concerns when they are brought to our attention and to making reasonable improvements when appropriate.

Certain portions of this website may also incorporate third-party content, applications, plugins, scheduling tools, maps, videos, or other services that are outside of our direct control. While we encourage accessibility from the providers we work with, we cannot guarantee the accessibility or functionality of third-party technologies.

Need Assistance?

If you experience difficulty viewing this website, accessing information, or using any of its features, please contact our office. We will make reasonable efforts to provide the information, service, or assistance you are seeking through an accessible alternative method when possible.

When reporting an accessibility concern, please provide the specific page or feature you were attempting to access, a brief description of the issue you encountered, and your preferred method of contact. This information will help us investigate and address the concern as efficiently as possible.

We welcome good-faith comments and suggestions regarding the accessibility of our website and appreciate the opportunity to address accessibility concerns directly.
